ARGUSOFT HACKATHON SERIES

GrantFlow

Grant Lifecycle Management Platform

Product Requirements Document

4-Person Team | 8-Hour Sprint

Internal — Argusoft

1. Overview & Purpose

You are building GrantFlow — an end-to-end Grant Lifecycle Management Platform. The platform serves a single grant-making organisation that runs multiple grant programmes and manages the full journey from application intake through to final compliance reporting and fund disbursement.

The platform serves two types of users:

- Internal Staff — Program Officers, Reviewers, Finance Officers — who manage the grant lifecycle end to end.
- External Applicants — NGOs, institutions — who apply for grants, track their application status, and submit compliance reports.

What Makes This Platform Distinctive

GrantFlow is not a form-collection tool. It is an intelligent platform where an Agentic AI layer actively performs meaningful work at critical stages of the lifecycle, reducing manual effort and improving decision quality. The AI assists in three primary areas:

- When an applicant submits — the platform automatically analyses the application for eligibility and narrative quality, producing a structured screening report for the Program Officer.
- When a reviewer opens an application — the platform has already read and analysed the full application, producing a summary, suggested scores, and risk flags before the human reviewer starts work.
- When a grantee submits a progress report — the platform automatically compares the report against the approved application, checks financial consistency, and flags anomalies for review.
- When an applicant is filling out an application — the platform offers an AI-guided conversational mode that walks the applicant through every question instead of presenting a static form.

AI Boundaries

The AI must never take final decisions. Every AI output is a recommendation for a human to confirm, modify, or override. AI must not send communications directly to applicants, and must not initiate or approve disbursements. Human accountability is preserved at every decision point.

2. User Roles & Permissions

Role	Who They Are	Key Permissions
Platform Admin	IT/ops lead of the grant-making organisation	Full system access; configure programmes, user accounts, and templates
Program Officer	Day-to-day grants operations staff	View all applications; manage screening outcomes; send communications; manage compliance; set award decisions
Grant Reviewer	Subject-matter expert assigned to review applications	View assigned applications only; enter review scores; view AI review analysis
Finance Officer	Finance department staff	Manage disbursements; upload payment confirmations; view fund utilisation; verify expenditure records
Applicant	NGO or institution applying for a grant	Submit applications; track own application status; submit progress and final reports; communicate with Program Officer

3. Grant Programme Catalogue

The platform ships with three pre-configured grant types. Eligibility rules, scoring rubrics, document checklists, and workflow stages are defined in this section. Teams should not design their own grant types.

GRANT TYPE 1 Community Development Grant (CDG)

Programme Summary

Attribute	Value
Purpose	Fund community-level infrastructure and social service projects
Funding Range	INR 2,00,000 – INR 20,00,000 per grant
Project Duration	6 to 18 months
Eligible Applicants	Registered NGOs, Trusts, Section 8 Companies with minimum 2 years of operation
Geographic Focus	Rural and semi-urban areas in India
Annual Cycle	Applications open April 1 – June 30 each year
Maximum Awards / Cycle	10 grants
Total Programme Budget	INR 2 Crore per cycle

CDG Application Form — All Fields

The following fields must be collected in the CDG application. Both the manual wizard mode and the AI chatbot mode collect exactly these fields.

Section	Fields
Organisation	Legal Name of Organisation
Organisation	Registration Number
Organisation	Type of Organisation
Organisation	Year of Establishment
Organisation	District & State
Organisation	Contact Person Name
Organisation	Contact Email
Organisation	Contact Phone
Organisation	Annual Operating Budget (INR)
Project	Project Title
Project	Project Location (District, State)
Project	Project Type

Section	Fields
Project	Problem Statement
Project	Proposed Solution
Project	Target Beneficiaries (number)
Project	Beneficiary Demographics
Project	Project Start Date
Project	Project End Date
Project	Key Activities (list)
Project	Expected Outcomes
Budget	Total Amount Requested (INR)
Budget	Personnel Costs (INR)
Budget	Equipment & Materials (INR)
Budget	Travel & Logistics (INR)
Budget	Overheads (INR)
Budget	Other (INR)
Budget	Budget Justification
Experience	Relevant Prior Projects (describe 2)
Experience	Has org received grants before?
Experience	If yes — prior funder name and amount
Declaration	Authorised Signatory Name
Declaration	Designation
Declaration	Date of Submission

CDG Required Documents

Document	Notes
Registration Certificate	Certificate of Registration / Trust Deed / MOA-AOA
FCRA Certificate (if applicable)	Only if foreign funds received previously
80G / 12A Tax Certificate	Tax exemption proof
Last 2 Years Audited Financial Statements	Signed by registered CA
Project Budget Breakdown	Detailed line-item budget matching form totals
Board Resolution authorising application	Signed by Chairperson
Photographs of target community / site	Evidence of problem statement

CDG Eligibility Criteria

#	Criterion	Rule
E1	Organisation Type	Must be NGO, Trust, or Section 8 Company
E2	Minimum Age	Year of establishment <= current year – 2
E3	Geographic Focus	Project location must be in a rural/semi-urban district (lookup table)
E4	Funding Range	Amount requested between INR 2L and INR 20L
E5	Project Duration	End date – start date between 6 and 18 months
E6	Budget Overhead	Overhead line <= 15% of total requested amount
E7	Budget Total	Sum of all budget lines must equal total amount requested (+/– INR 500)
E8	Thematic Alignment (AI)	Project description must align to community development themes — AI score >= 60% Flag to Suitable User
E9	Beneficiary Count (AI)	Must be > 0 and reasonable for budget — AI check: cost per beneficiary < INR 50,000 Flag to Suitable User

CDG Scoring Rubric

Dimension	Weight	What Scores 5	What Scores 1
Community Need & Problem Clarity	25%	Clear evidence of need, backed by data, local context well described	Vague problem, no evidence, generic
Project Design & Feasibility	25%	Detailed, realistic activities, clear timeline, logical flow	No clear plan, unrealistic timeline
Organisation Track Record	20%	2+ similar projects delivered, clear team roles, credible history	No prior experience, team unclear
Expected Impact & Outcomes	20%	Specific, measurable, realistic outcomes with clear beneficiary count	Vague outcomes, no numbers
Budget Realism	10%	Each line justified, cost-effective, overhead within limit	Inflated or unexplained costs

CDG Workflow Stages

Stage	Who Acts	SLA (Working Days)	Status Labels
1. Submitted	System (auto)	Instant	Submitted
2. Eligibility Screening	AI Agent (auto)	1 day	Screening / Eligible / Ineligible
3. Under Review	Grant Reviewer	7 days	Under Review / Review Complete

Stage	Who Acts	SLA (Working Days)	Status Labels
4. Award Decision	Program Officer	3 days	Approved / Rejected / Waitlisted
5. Agreement Sent	System (auto)	1 day	Agreement Sent / Agreement Acknowledged
6. Active Grant	Finance Officer	Ongoing	Active
7. Reporting	Applicant / Program Officer	Per schedule	Report Due / Submitted / Reviewed
8. Closed	Program Officer	On final report approval	Closed

GRANT TYPE 2 Education Innovation Grant (EIG)

Programme Summary

Attribute	Value
Purpose	Fund technology-enabled or pedagogy-innovation projects improving learning outcomes in government schools
Funding Range	INR 5,00,000 – INR 50,00,000 per grant
Project Duration	12 to 24 months
Eligible Applicants	NGOs, EdTech non-profits, Research institutions, Universities (public or private)
Geographic Focus	Any state in India; preference for aspirational districts
Annual Cycle	Rolling applications — reviewed quarterly (Jan, Apr, Jul, Oct)
Maximum Awards / Cycle	5 grants per quarter
Total Programme Budget	INR 5 Crore per year

EIG Application Form — All Fields

Section	Field Label
Organisation	Legal Name
Organisation	Registration Number
Organisation	Organisation Type
Organisation	Year of Establishment
Organisation	State of Registration
Organisation	Primary Contact Name
Organisation	Primary Contact Email
Organisation	Primary Contact Phone
Innovation	Project Title
Innovation	Innovation Type
Innovation	Problem Being Solved
Innovation	Innovation Description
Innovation	Target Schools & Districts
Innovation	Number of Schools Targeted
Innovation	Number of Students to Benefit
Innovation	Grade Levels Targeted
Innovation	Technology Tools / Platform Used (if any)
Innovation	Evidence Base (cite any research)

Section	Field Label
Team	Project Lead Name & Qualification
Team	Team Size
Team	Team Expertise Description
Team	Key Partners (if any)
Impact	Primary Learning Outcome Targeted
Impact	Measurement Plan
Impact	Baseline Assessment Plan
Timeline	Project Start Date
Timeline	Project End Date
Timeline	Key Milestones (list 3–6)
Budget	Total Requested (INR)
Budget	Personnel Costs (INR)
Budget	Technology / Software (INR)
Budget	Training & Workshops (INR)
Budget	Content Development (INR)
Budget	Overheads (INR)
Budget	Other Costs (INR)
Budget	Budget Justification
Declaration	Authorised Signatory Name & Designation
Declaration	Date

EIG Required Documents

Document	Notes
Registration / Incorporation Certificate	—
Last 2 Years Audited Financials	Signed by registered CA
Proof of prior education project (report or case study)	Mandatory for NGOs / EdTechs; optional for universities
School Partnership Letters (min 2)	MoU or letter of intent from target schools / district education office
Team CVs (Project Lead + 2 key members)	1-page CV format
Detailed Budget with Breakdown	Line-item detail
Product Demo / Prototype (if technology-based)	Screenshots, demo video link, or working URL

EIG Eligibility Criteria

#	Criterion	Rule
E1	Organisation Type	NGO / EdTech Non-profit / Research Institution / University only
E2	Minimum Operation Period	Established >= 1 year ago
E3	Funding Range	Amount between INR 5L and INR 50L
E4	Project Duration	12–24 months
E5	Schools Targeted	Minimum 5 schools
E6	Grade Coverage	Must target at least one grade level selected
E7	Budget Overhead Cap	Overheads <= 15% of total
E8	Budget Total Match	Budget lines must sum to requested total (+/– INR 500)
E9	Education Theme Alignment (AI)	AI NLP score for education innovation alignment >= 65% // Flag to Suitable User
E10	Impact Measurement Plan (AI)	AI checks whether a measurable plan with indicators exists — flags if vague // Flag to Suitable User

EIG Scoring Rubric

Dimension	Weight	Scoring Guidance
Innovation & Novelty	25%	5 = Demonstrably new approach with evidence base; 1 = Same as existing programs, no differentiation
Educational Impact Potential	25%	5 = Clear, measurable impact on learning outcomes with strong measurement plan; 1 = Vague outcomes
Team & Organisational Capacity	20%	5 = Expert team with proven education sector delivery; 1 = No relevant experience
Scalability & Sustainability	15%	5 = Clear plan to scale beyond grant period; 1 = No plan post-grant
Budget Efficiency	15%	5 = Cost per student < INR 500 and all lines justified; 1 = High cost, unjustified lines

EIG Workflow Stages

Stage	Who Acts	SLA	Status Labels
1. Submitted	System	Instant	Submitted
2. Eligibility Screening	AI Agent	1 day	Screening / Eligible / Ineligible

Stage	Who Acts	SLA	Status Labels
3. Under Review	Grant Reviewer (2 reviewers assigned)	10 days	Under Review / Review Complete
4. Award Decision	Program Officer	5 days	Approved / Rejected / Waitlisted
5. Agreement Sent	System	1 day	Agreement Sent / Acknowledged
6. Active Grant — Milestone Tracking	Finance + Program Officer	Per milestones	Active
7. Quarterly Reporting	Applicant / Program Officer	Quarterly	Report Due / Submitted / Reviewed
8. Closed	Program Officer	On final report	Closed

GRANT TYPE 3 Environment & Climate Action Grant (ECAG)

Programme Summary

Attribute	Value
Purpose	Fund grassroots environmental conservation, climate resilience, and clean energy access projects
Funding Range	INR 3,00,000 – INR 30,00,000 per grant
Project Duration	6 to 24 months
Eligible Applicants	NGOs, Farmer Producer Organisations (FPOs), Panchayat bodies, Research institutions
Geographic Focus	India — priority given to climate-vulnerable districts (coastal, drought-prone, flood-prone, hill regions)
Annual Cycle	Applications open twice yearly: Jan 1–Feb 28 and Jul 1–Aug 31
Maximum Awards / Cycle	15 grants per window
Total Programme Budget	INR 3 Crore per year

ECAG Application Form — All Fields

Section	Field Label
Organisation	Legal Name
Organisation	Registration Type
Organisation	Registration Number
Organisation	Year Established
Organisation	District & State
Organisation	Contact Person
Organisation	Contact Email
Organisation	Contact Phone
Environment	Project Title
Environment	Thematic Area
Environment	Environmental Problem Description
Environment	Proposed Intervention
Environment	Geographic Coverage (hectares / villages / km coastline)
Environment	Direct Beneficiaries (number)

Section	Field Label
Environment	Community Involvement Plan
Environment	Environmental Indicators (list 3–5 measurable indicators)
Environment	Climate Vulnerability Context
Environment	Risk of Not Acting
Team	Project Lead Name & Expertise
Team	Team Description
Team	Government / Institutional Partnerships
Timeline	Start Date
Timeline	End Date
Timeline	Activity Plan (month-wise for first 6 months)
Budget	Total Requested (INR)
Budget	Community Engagement & Wages (INR)
Budget	Equipment & Tools (INR)
Budget	Saplings / Seeds / Materials (INR)
Budget	Technical Expertise / Consultants (INR)
Budget	Overheads (INR)
Budget	Other (INR)
Budget	Budget Justification
Declaration	Authorised Signatory Name & Designation
Declaration	Date

ECAG Required Documents

Document	Notes
Registration Certificate	—
Last 2 Years Audited Financials	Signed by CA
Land / Site Permission Letter	From relevant authority — Gram Panchayat / Forest Dept / CRZ authority

Document	Notes
Community Consent Documentation	Gram Sabha resolution or community meeting minutes
Environmental Baseline Data (photos, reports)	Site photos, existing environmental assessment
Detailed Budget Breakdown	Line-item with quantities and unit rates
Prior environmental project report	Optional but strongly recommended

ECAG Eligibility Criteria

#	Criterion	Rule
E1	Organisation Type	NGO / FPO / Panchayat / Research Institution only
E2	Funding Range	INR 3L – INR 30L
E3	Duration	6–24 months
E4	Budget Overhead Cap	Overheads <= 15% of total
E5	Budget Total Match	Budget lines sum to requested total (+/– INR 500)
E6	Geographic Priority Check (AI)	Project location checked against climate-vulnerable district list — non-priority flagged but not rejected
E7	Environmental Theme Alignment (AI)	AI score for environmental / climate themes >= 60% Flag to Suitable User
E8	Community Involvement (AI)	AI checks community involvement plan exists and is substantive Flag to Suitable User

ECAG Scoring Rubric

Dimension	Weight	Scoring Guidance
Environmental Impact & Urgency	30%	5 = High urgency, large-scale verified impact on ecosystem; 1 = Low urgency, minimal impact
Community Ownership & Inclusion	25%	5 = Deep community co-design, beneficiaries are implementers; 1 = Top-down, community passive
Technical Soundness	20%	5 = Scientifically valid approach, indicators measurable; 1 = No evidence basis, vague indicators
Organisation & Team Capacity	15%	5 = Proven track record in environment sector; 1 = No relevant experience
Budget Realism & Sustainability	10%	5 = Lean budget, community contribution included, sustains post-grant; 1 = Expensive, no sustainability

ECAG Workflow Stages

Stage	Who Acts	SLA	Status Labels
1. Submitted	System	Instant	Submitted
2. Eligibility Screening	AI Agent	1 day	Screening / Eligible / Ineligible
3. Under Review	Grant Reviewer	7 days	Under Review / Review Complete
4. Award Decision	Program Officer	3 days	Approved / Rejected / Waitlisted
5. Agreement Sent	System	1 day	Agreement Sent / Acknowledged
6. Active Grant	Finance Officer	Ongoing	Active
7. Reporting	Applicant / Program Officer	At 6 months + end	Report Due / Submitted / Reviewed
8. Closed	Program Officer	On final report	Closed

Module 1 Grant Programme Catalogue

Displays and manages the three pre-configured grant programmes available for applicants and staff to browse.

Scenarios & Functional Requirements

1.1 Public Grant Discovery

- Any visitor (logged in or not) should be able to view a public-facing page listing all active grant programmes.
- Each programme listing must display: name, purpose summary, funding range, project duration range, application deadline, and eligibility highlights.
- Clicking a programme should show a full detail page with all programme attributes.

1.2 Eligibility Pre-Check (No Login Required)

- Any visitor should be able to run a quick eligibility check without registering.
- The pre-check collects: organisation type, project district, and funding amount requested.
- The system evaluates hard eligibility rules only and returns a "Likely Eligible / Likely Not Eligible" result for each grant programme, with the specific reason for any ineligibility.

1.3 Personalised Eligibility Banner (Logged-in Applicants)

- After login, applicants should see a personalised eligibility banner based on their saved organisation profile — showing which programmes they are likely eligible for without needing to re-enter information.

Module 2 Applicant Portal & Application Intake

Enables applicant registration, organisation profiling, document management, and dual-mode application submission.

Scenarios & Functional Requirements

2.1 Applicant Registration

- New applicants must be able to self-register with: full name, organisation name, email, password, and phone number.
- Email OTP verification is required before the account is activated.
- After login, applicants complete an Organisation Profile covering: organisation name, registration number, type, state, annual budget, and contact person. This profile pre-fills fields across all applications.

2.2 Document Vault

- Applicants must be able to upload standing documents once (Registration Certificate, Audited Financials, 80G Certificate) to a personal document vault.
- These documents must be automatically attached to new applications and visible for re-use or replacement.

2.3 Dual-Mode Application

- The manual wizard presents the application with the following sections: Organisation, Project, Team, Budget, Documents, Review & Submit.
- Each step validates fields on the "Next" click.
- A running total is displayed for the budget section.
- The applicant must confirm a declaration before submitting.
- As an alternative to the wizard, applicants should be able to apply through a conversational AI interface. The AI interface should have functionality similar to the manual wizard.

AI Chatbot Scope

The AI chatbot is a guided data-collection interface. It asks questions and records what the applicant provides. It does not write or suggest content for the applicant's answers.

2.4 Document Upload

- Each grant type has a specific document checklist.

2.5 Application Submission & Dashboard

- The Applicant Dashboard shows all applications with: status pill, current workflow stage, and last updated timestamp.
- Applicants must be able to see a stage timeline indicating which stage their application is at and what comes next.
- A Messages tab shows all communications from the Program Officer, Applicants can reply via the portal.
- For active grants, a Reports tab provides the report submission interface.

Module 3 Eligibility Screening

Automatically checks submitted applications against eligibility rules and produces a structured screening report for Program Officer review.

Scenarios & Functional Requirements

3.1 Hard Rule Checks

- The system must evaluate all eligibility rules for the relevant grant type (as defined in Section 3 of this document for each grant type).
- Each check result (pass or fail) must be individually recorded and displayed in the screening report.

3.2 Human Validation

- Soft Check 1 — Thematic Alignment: The system must analyse the project title, problem statement, and proposed solution text. Relevant applications must be soft-flagged for human validation.
- Soft Check 2 — Narrative Quality: The system must assess the problem statement, proposed solution, and expected outcomes for: logical coherence between problem → solution → outcomes; specificity of the beneficiary description; and presence of at least one measurable outcome indicator. Relevant applications must be soft-flagged for human validation.
- Soft flags are advisory — the Program Officer decides what action to take.

3.3 Screening Report

- The system must generate a structured screening report after all checks are complete.
- The report must be presented to the Program Officer.

3.4 Program Officer Review of Screening

- Program Officers must be able to review the screening report and take one of three actions: Confirm Eligible (advance to review queue), Override to Ineligible (written reason required), or Send Clarification Request to applicant.
- Clarification requests: the Officer selects which flag to address, types a question, and the system sends it to the applicant via the messaging system. The applicant's response is attached to the application record.

Module 4 Application Review & Scoring

Enables reviewer assignment and structured application review, supported by AI-generated summaries, scores, and risk flags.

Scenarios & Functional Requirements

4.1 Reviewer Assignment

- Program Officers must be able to assign reviewers to eligible applications from a list of available staff with the Reviewer role.
- The system must enforce a conflict-of-interest rule: a reviewer whose email domain matches the applicant's email domain cannot be assigned.
- CDG and ECAG applications require one reviewer; EIG applications require two reviewers.

4.2 AI-Generated Review Package

- Before a reviewer opens an application, the system must automatically generate a Review Package containing three components:
  - Application Summary: A structured one-page summary covering who is applying, what they want to do, where, for how many beneficiaries, for how long, and how much — allowing the reviewer to understand the full application in approximately two minutes.
  - AI-Suggested Scores: For each scoring dimension defined in the grant type's rubric, the system must produce: a suggested score (1–5), a written justification (citing specific text from the application), and a reference to which section of the application the justification draws from.
  - Risk Flags: The system must scan the application for five categories of risk — (1) budget anomalies where a single line exceeds 60% of the total, (2) unrealistic timelines given the scope of activities, (3) vague or unmeasurable outcomes, (4) team size appearing insufficient for the project scope, (5) prior grant history indicating incomplete projects. Each flag must have a severity level: High / Medium / Low.
- All AI scores must be clearly labelled as "AI Suggested" throughout the interface.

4.3 Reviewer Workspace

- The reviewer workspace must display: application content with document download links, the AI Review Package (summary, suggested scores, risk flags), and a scoring sheet.
- The scoring sheet must show each rubric dimension with the AI-suggested score. The reviewer must confirm or override each score.
- If a reviewer overrides an AI-suggested score, a written comment is mandatory.
- Reviewers must be able to highlight text in the application and attach a note to it.
- Scores must auto-save so reviewers can return and continue.
- Once all dimensions are scored, the reviewer submits the review.

4.4 Program Officer Post-Review View

- All reviewed applications must appear in a Program Officer queue showing: composite score, individual dimension scores, reviewer identity, and risk flags.
- The Officer must be able to sort and filter by score, grant type, reviewer, and date.
- The Officer sets a final decision for each application: Approve / Reject / Waitlist, with a mandatory written reason.
- The decision must be recorded and automatically trigger the next workflow stage.

Module 5 Grant Award & Agreement Management

Manages award notifications, grant agreement generation, and disbursement schedule configuration.

Scenarios & Functional Requirements

5.1 Award, Rejection & Waitlist Notifications

- On a decision of Approve: the system generates an Award Letter from the defined template and presents it to the Program Officer for review before sending.
- On a decision of Reject: the system generates a Rejection Letter from the defined template with the stated reason. The Officer reviews before sending.
- On Waitlist: the system sends a Waitlist Notification. No further action until a slot opens.
- All letters must use the merge field templates defined below.

5.2 Grant Agreement Generation

- Program Officers must be able to generate a Grant Agreement for approved applications by clicking a "Generate Agreement" action.
- The system must auto-populate the agreement with data from the application and applicant profile: grantee legal name, registration number, address, grant reference number, programme name, award date, project title, project description, grant amount, disbursement schedule, reporting schedule, and any special conditions entered by the Officer.
- The Officer reviews the populated agreement and sends it to the grantee as a PDF.
- The grantee acknowledges the agreement via a link in their portal — the acknowledgement is recorded with a timestamp.

5.3 Disbursement Schedule Configuration

- During agreement generation, the Program Officer configures disbursement tranches. Supported types:
  - Inception Tranche — released on agreement acknowledgement (used for CDG and ECAG).
  - Mid-Project Tranche — released when the 6-month report is approved by the Program Officer.
  - Final Tranche — released when the final report is approved and accepted.
  - Milestone-based Tranche — released on approval of a specific deliverable (used for EIG).
- Each tranche must have: a label, an amount (INR), a trigger condition, and a status (Pending / Ready / Disbursed).
- Finance Officers must be able to add and view bank details for the grantee (account number, IFSC, beneficiary name). This information must be accessible only to the Finance Officer role.

Document Templates

The following three templates must be implemented exactly as defined. Platform Admin can edit the text body; merge field structure is fixed.

Template 1 — Award Letter Merge Fields

{{award_date}} | {{grant_reference}} | {{grantee_authorised_signatory}} | {{grantee_organisation_name}} | {{grantee_address}} | {{programme_name}} | {{application_reference}} | {{project_title}} | {{award_amount}} | {{start_date}} | {{end_date}} | {{program_officer_email}} | {{program_officer_name}} | {{program_officer_designation}} | {{organisation_name}}

Template 2 — Rejection Letter Merge Fields

{{decision_date}} | {{grant_reference}} | {{grantee_contact_name}} | {{grantee_organisation_name}} | {{programme_name}} | {{application_reference}} | {{rejection_reasons}} | {{program_officer_email}} | {{program_officer_name}} | {{program_officer_designation}} | {{organisation_name}}

Template 3 — Grant Agreement Merge Fields

{{agreement_date}} | {{grantor_organisation_name}} | {{grantor_address}} | {{grantee_organisation_name}} | {{grantee_org_type}} | {{grantee_registration_number}} | {{grantee_address}} | {{project_title}} | {{project_location}} | {{programme_name}} | {{grant_reference}} | {{award_amount}} | {{award_amount_words}} | {{tranche1_amount}} | {{tranche2_amount}} | {{tranche3_amount}} | {{start_date}} | {{end_date}} | {{reporting_schedule}} | {{special_conditions}} | {{program_officer_name}}

Module 6 Compliance Reporting & Fund Utilisation

Manages grantee progress and final report submission, AI-assisted compliance analysis, and fund utilisation tracking.

Reporting Schedule

Grant Type	Reports Required	Due Dates
CDG	1 x 6-Month Progress Report, 1 x Final Report	Month 6 from start date; within 30 days of end date
EIG	3 x Quarterly Reports, 1 x Mid-Project Report (month 12), 1 x Final Report	End of each quarter; month 12; within 30 days of end date
ECAG (6–12 months)	1 x Mid-Point Report, 1 x Final Report	Midpoint; within 30 days of end date
ECAG (13–24 months)	1 x 6-Month Report, 1 x 12-Month Report, 1 x Final Report	Month 6; month 12; within 30 days of end date

Scenarios & Functional Requirements

6.1 Report Submission

- Grantees must be able to submit reports via their portal (My Grants → Submit Report) using the static templates defined below.
- All reports must use the progress report template. Final reports include additional sections.

Progress Report Template Fields

Field	Guidance
Activities completed this period	Min 100 words. List each activity and what was achieved.
Activities planned but not completed (with reason)	Explain any delays or deviations from original plan.
Activities planned for next period	Min 50 words
Number of beneficiaries reached (cumulative)	Cumulative count
Beneficiary disaggregation: Male / Female / Other	
Progress on each stated outcome	Min 100 words. Reference outcomes from application.
Key challenges and how addressed	Min 50 words
Total expenditure this period (INR)	
Cumulative expenditure to date (INR)	Running total

Field	Guidance
Expenditure by budget line (table)	Approved budget, spent this period, cumulative spent per line
Variance explanation (lines with >10% deviation)	
Plans for next reporting period	Min 50 words
Support needed from Program Officer	Optional
Evidence attachments	Max 10 files

Final Report Additional Fields

Field	Guidance
Overall project achievement vs objectives	Compare planned to achieved — min 200 words
Total beneficiaries reached (final, with disaggregation)	Final cumulative count
Key outcomes achieved	Each outcome: achieved / partially / not achieved with explanation
Lessons learned	What worked, what did not, what would you do differently — min 100 words
Sustainability plan	How outcomes continue after the grant ends
Final financial statement	Final reconciliation of all expenditure vs approved budget + signed statement
Auditor Certificate (if grant > INR 10 lakh)	Signed utilisation certificate from registered CA
Project photos (final state)	Photos showing project outcomes

6.2 AI Compliance Analysis

- When a report is submitted, the system must automatically analyse it and prepare a compliance analysis for the Program Officer — no manual trigger required.
- The content analysis must evaluate: whether activities described are consistent with what was approved in the application; whether beneficiary progress is on track relative to the project timeline; whether the narrative acknowledges any significant deviation from the plan; and whether the report appears to be balanced (i.e., acknowledges challenges rather than being entirely positive).
- The financial analysis must verify: arithmetic consistency between period expenditure, cumulative expenditure, and line-item totals; any budget line where cumulative spend deviates more than 10% from the approved budget; whether a variance explanation exists for each deviated line; and underspend alerting — if cumulative spend is below 30% of total budget at 50% or more of the project timeline.
- The analysis must produce an overall content quality rating (Satisfactory / Needs Clarification / Concerns Found), a list of specific flags with field references, and a recommended action.

6.3 Program Officer Report Review

- Actions: Approve Report / Request Clarification / Flag for Compliance Action.
- Approving a report must automatically trigger any milestone-linked disbursement tranche.
- Compliance Action flags must have a severity level: Warning / Disbursement Hold. A Disbursement Hold must notify the Finance Officer.

6.4 Fund Utilisation Dashboard

- Per-grant view: budget vs actuals bar chart by budget line; running burn chart over the project timeline; disbursement history table (tranche, amount, date, status).
- Grantees submit individual expenditure records: date, payee, amount, budget category, description, receipt upload.
- Finance Officers review submitted records and mark as Verified or Queried.
- Programme-level view: total committed across all active grants; total disbursed; total reported expenditure; grant count by status.
- Finance Officers must be able to export any view as CSV or PDF.

Module 7 Notifications & Communications

Manages automated event-driven notifications and in-app messaging between staff and applicants.

7.1 Automated Notification Events (In-App)

Trigger Event	Recipient	Content
Application Submitted	Applicant	Confirmation with reference number and PDF copy
Screening Complete — Eligible	Applicant	"Your application has passed initial screening and is under review"
Screening Complete — Ineligible	Applicant	Ineligibility notification with reason(s) from screening report
Clarification Requested	Applicant	Question(s) from Program Officer with response deadline
Review Assigned	Reviewer	Link to review queue with application list
Review Due Reminder (3 days before SLA)	Reviewer	Reminder with overdue count
Award Approved	Applicant	Award letter (reviewed by Officer before sending)
Application Rejected	Applicant	Rejection letter with reason (reviewed by Officer)
Agreement Sent	Applicant	Agreement PDF + acknowledgement link
Tranche Released	Applicant	Disbursement confirmation with amount and date
Report Due Reminder	Applicant	30, 14, and 7 days before due date
Report Overdue	Applicant + Program Officer	Overdue alert — every 3 days until submitted
Report Approved	Applicant	"Report approved — next tranche will be released"

7.2 In-App Communication Thread

- Every application must have a Messages tab where all correspondence between the Program Officer and Applicant is threaded.
- Program Officers must be able to initiate a message from within the application management view.
- Applicants respond via the portal — responses appear in the thread and trigger an email notification to the Officer.
- Internal Notes: Officers must be able to add notes visible only to staff — these are never sent to the applicant and are not shown in the applicant's portal.

Module 8 Platform Administration

Provides user management, audit logging, and an analytics dashboard for platform administrators.

8.1 User Management

- Platform Admins must be able to create staff accounts (Program Officer, Reviewer, Finance Officer).
- Applicants self-register. Platform Admin can deactivate any applicant account.

8.2 Audit Log

- Every action on the platform must create an immutable log entry recording: actor, action performed, object affected, and timestamp.

Good luck, and build something impactful.
